Accessing full-text articles and e-books (Anthony Guerrero, M.D., 7/22/2009)

Basic Access: UH Health Sciences Library
Log on to http://www.hawaii.edu/hslib/ (or you may also Google “UH Health Sciences Library)

A. To access full-text journals:
   1. Select “PubMed Medline”
2. Click on PubMed Medline (with full text links):

3. Click: Login through the UH Web Login Service
4. Enter your UH username and password (hawaii.edu account, not dop.hawaii.edu account)
5. If you do not have a hawaii.edu account, please go to The University of Hawaii System at the following link to check your status and obtain an account: https://myuh.hawaii.edu:8888/sessionid=nobody/am-sso-check-status
6. Enter your search terms on PubMed

7. IF you see the icon circled (UHM Libraries – Online), it means that UH has online access to the full text article, and you may click here to obtain it.
8. If you DON’T see this icon, you may click on “find it”. ...
9. And you will be prompted to other ways to access the full-text article.
   a. There may be another link to the electronic article, or
   b. you may need to request the article via inter-library loan (which
      usually takes a few days… though not unreasonable, and for which
      the full-text article will be e-mailed to your hawaii.edu, not
      dop.hawaii.edu, account)

10. Of note, PsycInfo is also useful for accessing the psychological and social
    sciences literature. To get here from the first screen, click under “More
    Databases”
11. Scroll down to PsycInfo, and click on to start a search on this database.
B. To access e-books:

1. Click on “E-books”

2. You will probably be interested in Psychiatry, but there are several other categories:
3. Sample of books available:
