Child and Adolescent Psychiatry Faculty Positions

Virginia Commonwealth University, Department of Psychiatry is recruiting two Child and Adolescent Psychiatrists with academic career interests to provide clinical care, consultation, and supervise/teach residents/medical students and work with Advanced Practice Nurses.

The position provides clinical services, through inpatient and/or outpatient services, along with telepsychiatry at the Virginia Treatment Center for Children on the VCUHS Medical Campus. VTCC works collaboratively with the VCUHS and Children’s Hospital of Richmond Pediatric Department, child servicing organizations, state agencies, and others to deliver exemplary psychiatric services. A new, state of the art facility will be opening in 2017, with expanded capacity for inpatient and outpatient, research and teaching facilities. As a VCU Department of Psychiatry Faculty member, the position will have the opportunity to teach and work with medical students, residents and fellows. Rotational evening/weekend coverage with VCU Division of Child and Adolescent Psychiatry for inpatient and consultation services is shared within the Medical Team.

All successful candidates will have demonstrated experience working in the community setting working within a system of care approach for pediatric patients and their families, and fostering an interdisciplinary team approach and working with families, diverse faculty, staff, and student environment or commitment to do so as a faculty member at VCU.

VCU Department of Psychiatry employs over 80 fulltime faculty and has well-funded research in genetics, addictions, child and women’s mental health and psychopharmacology. VCU is a large urban university with a robust health science campus and 750-bed university hospital. We are national innovators in cancer, burn and trauma care. Our practice specialties include 19 clinical departments. Together we evaluate and treat even the most complex medical conditions, leveraging the latest procedures and state-of-the-art technologies. We teach hundreds of future physicians and our nationally renowned research programs have seen a nearly 40% rise in NIH funding. They encompass 23 specialties — including addictions, atherosclerosis, cancer, diabetes, kidney and pulmonary disease, epidemiology, and sickle cell disease. At VCU Health, there’s no limit to how far your imagination can take your career in practice, education or research.

VCU is an Equal Opportunity/Affirmative Action employer. Women, minorities, and persons with disabilities are encouraged to apply.
